

Moving from the Strahov dormitories to other dormitories

The moving of those accommodated in the Strahov dormitories to other blocks or dormitories is possible after agreement with the economic manager of the two dormitories to which the move concerns and under increased security measures against the spread of unwanted insects between the dormitories.

The accommodated is obliged to wash his clothes (5 cycles free) and if appropriate use one of the large-capacity freezers located in Strahov on blocks 4, 7 and 9 to treat other items. Both services are free for accommodated.

In the case you end your accommodation at the Strahov dormitory and move to private accommodation we also recommend washing and freezing your belongings.

You can get more information from the economic manager of the individual blocks. You can find the contacts on the website.
